#### **Educational Objectives:**

Participants will demonstrate the ability to interpret sound effects.

- Identify environmental and communicative sound elements to target for translation
- Reproduce (model) visual translation of sound effects as seen in clips of Deaf storytelling
- Identify sign features (i.e. classifier handshapes, movements) which translate specific sounds
- Demonstrate interpreting techniques to convey audio visually, in context
- Visually interpret sound-based elements of communication (nuance, emphasis, etc.)

My workshops benefit participants at all levels. Countless advanced interpreters have let me know that they enjoyed learning updated/new signs that they haven't seen before, such as regional accents. They also loved it when I explained how to sign messages into ASL, rather than just signing in English word by word. Interpreters appreciate that my workshops are excellent for review as well as for discovering new things that apply within the professional work environment. Students also mentioned that my workshops helped them to understand how to approach their own projects, research, and practice more effectively.

**RSVP! Registration Fee: \$35**
